Basic Search

Basic Search can be used to search a single word, group of words, exact phrase or numbers. It will search for keywords within Agencies and Items.

It is often the best place to start a search. The search can be refined by using the **drop down boxes**.

This search is best used where there is likely to be a limited number of results, eg a name, a small place or locality or a specific term. If you wish to perform a more complex search, use **Advanced Search**.

Type your word(s) or phrase in the search box

To search type your word(s) or phrase in the search box:

The search will automatically truncate your term unless the 'exact phrase' option is used for searching, *i.e.* a search for *red* will also find Redondo, Redland, Redlands etc.

Tip: using fewer search terms can give you a better result as some images may not be specifically described in the catalogue.

All of the words: This is a Boolean 'and' search. It will find titles or descriptions which include all of the terms you have entered, in any order. This search automatically truncates, *i.e.* a search for *red* will also find Redondo, Redland, Redlands etc.

Any of the words: This is a Boolean 'or' search. It will find titles or descriptions which contain *at least one* of the terms you have entered. This search automatically truncates, *i.e.* a search for *red* will also find Redondo, Redland, Redlands etc.

The exact phrase: This will find the words together as an exact phrase – in the exact order, with no intervening words, and without truncation. For example, an 'exact phrase' search for *botanic garden* will not locate images described as *botanic gardens*.
